

drug development for **inflammatory** diseases

mbiosciences.

m · d · b

Inflammatory diseases are the number one cause of healthcare issues worldwide. Rheumatoid arthritis and multiple sclerosis are progressive and chronic inflammatory diseases. MD Biosciences provides expertise and preclinical contract services to drug discovery companies. We help breakthroughs happen.

Contract Research Services

MD Biosciences offers in vitro and in vivo services. Services include predictive ADME and toxicology capabilities, various in vivo disease models and biomarker analysis using all available methods. Combined in vivo and in vitro protocols can be performed making complex study designs possible. At MDB, we invest time into customizing protocols to meet individual needs.

m . d . b

Chronic inflammatory diseases are treated by a growing portfolio of biological and small molecule compounds. These new and often costly therapeutics require a more individualized therapy approach.

MDBiosciences is working on new diagnostic panels to assist in the selection of the right therapeutic agent, duration, and regimen for each individual patient.

on Rheumatoid Arthritis

Rheumatoid arthritis is one of the primary focus areas at MD Biosciences. This disease affects millions and challenges drug discovery companies around the globe in discovering therapies. Sponsors are supported by a team consisting of RA specialists, pharmaco-biologists in vivo laboratory personnel and project leaders. This in-depth coverage of RA provides sponsors with many advantages in achieving their goals and milestones.
